Education

Government College of Engineering, Karad

2021-2025

Bachelor of Technology in Information Technology

7.9 CGPA

Relevant Coursework

- Data Structures
- Algorithms
- Object Oriented
- Web Development
- Computer Networks
- Database Management
- Operating System
- Computer Architecture

Projects

SOS Alert and Police Dispatch System | *Java 21, Spring Boot 4, Redis, PostgreSQL, Maven, Postman, Docker* 

- Built a real-time police dispatch system to handle **high-frequency** SOS alerts and coordinate rapid emergency response, achieving sub-millisecond data writes and API latency under **15ms**.
- Designed a low-latency geospatial tracking system using **Redis** and **PostgreSQL** for real-time officer location updates, with **Docker-based deployment** for scalable and reliable operations.
- Developed a live command centre dashboard in **JavaScript** to monitor police activity, including patrol tracking, emergency incidents, and nearby unit dispatching.

PolicyPulse AI | *Java 21, Spring Boot, Spring AI, PostgreSQL, Spring Data JPA, Validation* 

- Developed a scalable **Spring Boot** microservice integrating Spring AI to automate text validation against compliance policies.
- Integrated **rule engine** with **AI-based** insights for smarter content evaluation.
- Engineered a rule-based **risk scoring algorithm** to quantify violation severity, ensuring high accuracy in compliance reporting.

Leaf Disease Detection System | *Python, TensorFlow, Keras, Flask, HTML/CSS* 

- Developed a plant disease detection system using **TensorFlow** and **Keras** to classify 38 disease categories.
- Built a robust **VGG19** Convolutional Neural Network (CNN) architecture to process augmented agricultural datasets.
- Designed a lightweight **Flask** web application for real-time, user-friendly image upload and prediction.
- Integrated an intuitive frontend using **HTML/CSS** to display accurate diagnostic results and actionable solutions.

Videoify | *NextJS, ShadCN, Stream, Clerk* 

- Prepared a video calling application with the ability to handle **10,000 monthly users** using **Clerk** sign-on authentication.
- Implemented meeting statistics over 5+ criteria and recording video calls via **Stream SDK**.

Position of Responsibility

Finance and Documentation Head

2023-2024

Information Technology Student Association

- Coordinated **Alumni Talk IT 2K23** with a 10+ member team.
- Handled speaker outreach, logistics, and managed transitions, resulting in 100+ attendees.

Joint-Secretary

2022-2024

House of Arts Club

- Co-ordinated **Spectrum** and **Shrunkhla**, an art event at the college level, with a team of over 15 members.
- Managed event finances, documentation, and on-site operations, and ensured smooth execution for 50+ attendees.

Skills

Languages: Java, HTML, CSS, C++, Python

Frameworks: Spring, Node, Tensorflow, Keras, Scikit-Learn, Flask

Developer Tools: VS Code, Git, Github, Docker, IntelliJ IDEA, Postman, PyCharm, Postgres, Redis

Soft Skills: Communication Skills, Teamwork

Achievements

- Secured 1st place at the **institute-level Smart India Hackathon** by developing a fake-news detection model in 36 hours.
- Gate '25 Qualified (Score: 381), Gate '26 Qualified (Score: 451)
- Led our four-member team to a first-place victory in the Smart India Hackathon internal rounds by building a Leaf Disease Detection System.
